VINOLOK SEALING RING

EVA by DOW

The sealing ring is made of material EVA (Ethylene Vinyl Acetate Copolymer) manufactured by DOW. It is not silicone resin and it is PVC and phthalates free. The ring complies with European regulations for materials intended to come into contact with beverages. It is not glued to the closure, you can remove it by hand and recycle.

INDEPENDENT TESTS OF VINOLOK

With over 15 years on the market, the performance of Vinolok has been thoroughly tested by research institutions and leading universities.

Vinolok introduction

Fully
recyclable
closure

FULLY RECYCLABLE THE GLASS BODY

Glass is the main part of the Vinolok closure, can be melted repeatedly and transformed into new Vinolok closures or other glass products.

Glass is a substance made from natural materials and it is one of the few materials that is fully recyclable without loss of quality.

Glass is an archetype of sustainable packaging and as such is usually the first choice for consumers who are environmentally conscious

IN HOUSE ECOLOGICAL PROCESSES

Water conservation

Internal recycling

Ecological production

Responsible sourcing

QUALITY FIRST

One of the main objectives of the Vinolok company is to provide customers with high-quality products and services. Every single glass closure passes 100% quality check four times during the production process and therefore Vinolok is a guarantee of securely sealed beverage.

In order to satisfy customers' existing and future product quality and safety requirements, the Vinolok company has established an Integrated Management System with the application of modern management principles and international standards.

ISO 9001 : 2015
Quality management system

ISO 14001 : 2018
Environmental management

ISO 22000 : 2015
Food safety system
